

Local Food Connection Proud Partner Fischer Farms

ABOUT

Fischer Farms is an Indiana producer and supplier of natural premium meats. Six generations of Fischers have farmed on the rolling hills in Indiana and they also partner with their neighbors to sell a variety of meats. This natural process makes the difference with high quality genetics, no growth hormones or antibiotics, no artificial additives in processing and a proven grazing and feed program. Calves are born on pasture, graze with their mothers, weaned and fed on pasture and finished in open air, bedded barns. Fischer is also dedicated to sustainability. You can feel good about eating these products because Fischer uses local, thoughtful distribution, practices sustainable water conservation, monitors soil health and carbon sequestration and their meat is always clean!
